HEAD BOW/FOOT BOW

These panels are the flagship product of the company. The panels are robust, ergonomic, aesthetic and come with a finish that complies with customer needs. For an unparalleled convenience of use, with help of connecting clamps & rods, they are extremely easy to assemble and remove. There are a variety of sticker color options available for these panels to enhance the aesthetics and sync with the interiors of the hospitals.

SIDE RAILING

Side railings complements the Head & Foot bow aesthetically. With a curved finish of our side rail, it enhances the look of the whole bed. There is a provision of angle indicator on the side rail which helps knowing the exact position of the bed while using motorized beds. Two side rails on one side covers the full length of the bed, thus not leaving any trap gaps in the bed.

BRACKET MECHANISM

Our side railing gives the feature of duck down railing with just a push of a button with the help of gas spring in the bracket. The push capacity is 80 kgs. We have an in-house manufacturing facility of these brackets with separate assembly line for the fitments.

BED BOARD PLANKS/BED LINERS

We have innovated the conventional mattress platform in plastic with two varieties 10-piece plastic bed board and 4-piece bed board to improve the bearing capacity of the bed board. The strength is much higher than the metal one as it shares the load equally. The 10 pc bed board plank is easy to attach with screws. The 4 pc bed liner is also easy to assemble on the metal bed frame. It is MRI & X-Ray compatible too. Both models are extremely time saving and also reduces the powder coating activity with respect to cost and labor.

* Carrying Warranty at Rajkot Office only on site warranty not provided free of cost.

* Due to constant upgradation design, price and features are subject to change any time without prior notice.

FITMENT TYPE

We have developed a variety of fitments for mounting bow to the bed frame easily. These are developed keeping in mind the functional requirements & are made of a combination of materials that makes them strong, sturdy, presentable & user friendly. Plastic rods fitment specially used for M1 & M2 in place of metal ones which are non-corrosive & user-friendly. We also have developed Hook & Clip metal fitments, specially used for M3 & M4.

BUFFER WHEELS

These plastic buffers work as great substitutes for rubber / PVC buffers. It provides safety from wall surface score marks on the head bow. They have good shock absorption property. Available in customized colors & sizes. Outer dia - 5 Inch & inner dia 10.2, 14.5, 26.4 and 32.6 mm options. There is a special type of buffer used in M3. It has a provision to hold the IV Rod pole.

Western Surgical

TWO POINT IV BAG HOLDER MODEL NO.: SEP-IV01

DESCRIPTION

It is designed specifically for the overhead suspension of drip bags without the need to use valuable floor space. It is always available at a moment's notice, yet remains discreetly unobtrusive. As the carrier is track mounted, it can be moved to one side of the cubicle when not in use, and can be positioned at either side of the bed, or above it if required.

SALIENT FEATURES

- ♦ Strong aluminum track, white powder-coated finish
- ♦ Economical 2-point drip carriers with nylon runners
- ♦ Track suspended at cubicle track height
- ♦ Capacity 3 kg per hook
- ♦ Hooks made of stainless steel SS304
- ♦ Mobile track option
- ♦ Suspension system available in stainless steel S304 and MS powder coating.

TELESCOPIC IV BAG HOLDER MODEL NO.: SEP-IV02

DESCRIPTION

It is becoming increasingly important that the area around a hospital bed should be as uncluttered as possible. It is now accepted that the patient's quality of life can have a direct bearing on recovery time, and the perceived intrusiveness of medical equipment may be a contributory factor.

SALIENT FEATURES

- ♦ Heavy-Duty 5 Bag Holder
- ♦ Heavy duty self-locking wheeled trolleys
- ♦ Five point telescopic carrier trees
- ♦ Made of stainless steel SS304 and aluminum with white powder coating on it & hooks are of SS304
- ♦ Strong aluminum track with white powder - coated finish
- ♦ Track suspended at cubicle track height

WS- 987A Scoop Stretcher (Telescopic/immobile)

A portable first aid stretcher, is commonly used for transporting bone fractured and seriously injured patients. A clutch zip design at the middle of the model, the stretcher can be divided into left and right parts. Both parts can be drawn out when you need to put the patient on the operating table or the hospital bed quickly without moving the patient. The stretcher length can be directly transferred into the ambulance. The stretcher can fold or be separated into two parts, easy to carry or transport.

TRANSFER TROLLEY SYSTEM

"The exchange area technique has come to stay. This new concept prevents any possibility of cross infection. On the way to the operating suite the patient is brought to the exchange area on a ward trolley. The under carriage of the ward trolley and that of the operating room along together in the exchange area. With the trolley top the patient is transferred to the operating room undercarriage on easy rolling castors. The undercarriage is then separated and patient is taken to the operating room. The reverse process taken place after the operation when the patient is to be shifted to his ward.

Tubular steel structure with removable stretcher of M.S. Sheet Top. Available with 7" dia. Wheels. Oxygen Cylinder Cage, Tray for Instruments, I.V. Attachment with saline Rod. Pretreated & Epoxy Power Coated or completely Stainless Steel.

Variable Height Tilt Table

Height adjustable tilt table with two motors. One motor ensures effortless and smooth tilting; the other adjusts height and facilitates patient transfer. The Variable Height Tilt Table is the ideal standing aid for neuromotor revalidation and adaptation exercises from lying to standing.

Another area where it can be applied is general orthostatic examination, more specifically examination and treatment of vasovagal syncope. Standard with three straps.

Standard model comes with a dual adjustable footplate. The tilt table also has a hoist access as standard and a quick release Trendelenburg positioning. It can also be fitted with an optional Torso Support for improved patient support and comfort, as well as an activity tray - for extra working space for hand activities.

CURTAIN TRACKS

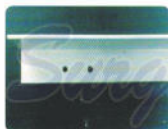

DESCRIPTION

Based on the talent and competency of our skilled workers, we bring forward a distinctive collection of Hospital Curtain Tracks. In order to attain maximum client satisfaction, we are providing these tracks in various size and dimensions. Used for hanging curtains, these tracks are appreciated for their smooth and tough built. Our offered range is widely appreciated in the markets for their glossy finish, stylish pattern and vibrant color options. In addition to this, the offered range is fabricated and designed using cutting-edge techniques and superb quality fabric that add a classy look.

SALIENT FEATURES

- Durable and longer working life
- Various dimensions
- Simple to connect and operate
- Eye-catching look

CURTAIN ACCESSORIES

1. Top Bottom Bush: It is used to hang curtain tracks from the roof and made of aluminum with track color powder coating on it.
2. Curtain Runner: Made of plastic with SS hook and plastic hook and full plastic runners.
3. Curtain Removal Point: It helps to remove the curtain runner. They are fixed in track and made of mild steel with zinc plating on it to prevent rusting.
4. Jointer Plates: It helps in joining two curtain tracks together. It is made of aluminum with powder coating on it.
5. Tracks End Cap: Curtain track and caps fully made of nylon material.

VERTICAL WINDOW BLINDS

DESCRIPTION

We are offering our clients an exclusive assortment of Vertical Blinds which is extensively demanded in homes, offices and other structures. Apart from enhancing the beauty of the place, these interior Vertical Blinds prevent moisture and dust from entering into rooms. Being a customer centric organization, we offer these sturdy and low maintenance Interior Vertical Blinds at competitive prices.

BLACKOUT ROLLER BLINDS

We offer an extensive array of Blackout Roller Blinds that is available in different options and accessories. These are designed uniquely by our efficient professionals to assure flexibility in window treatment. Further, these are acknowledged for their distinctive features like flame retardant finish and user-friendly interface.

UPVC DOORS AND WINDOWS

We offer a wide variety of UPVC products including casement doors and windows, fixed windows, tilt and turn windows, French doors and windows, top hung windows, etc. The uPVC windows are sound proof, eco-friendly, insulating, termite free and low maintenance.

POWER COLUMN

Power Column samples the organization of medical service equipment in one aesthetically appealing vertical headwall. It is a modular designed Product to provide a clean, sanitary and ordered environment. Furthermore it can enhance the quality in care and medical environment. Due to its systematized design, a network provided for medical care service is applicable to the use of secondary instruments and assemblies. The main structure consists of fluorescent panel, aluminum component and side track. Also includes power lines and medical gas piping. Side tracks are installed at four at angles, and the length is equal to the column. All the assemblies required by medical care personnel can be easily and securely placed on the side track of this column. Applications in mid to acute level environment

Features

- ◆ Designed for ease of maintenance and infection control.
- ◆ Built as a four-sided unit that offers 360° access to services and equipment management for critical care areas.
- ◆ Can be customized and upgraded to meet your facility's needs.
- ◆ Offered in a variety of widths and heights, tailored to meet your space needs.
- ◆ Wide selection of laminate colors are available.
- ◆ Multiple rail system allows for superior accessory management.
- ◆ Removable laminate panels allow for simplified maintenance.
